

Session 1

Que. – 1

- A program is a set of step-by-step instructions given to a computer to perform a specific task. For example, when you use the Instagram app and tap the "Like" button, a program runs in the background to increase the like count and turn the heart icon red.

Que. – 2

- **Python:** Usually **interpreted** .
- **Java:** Can be **both** (it is compiled into bytecode first, then interpreted/executed by the Java Virtual Machine).
- **JavaScript:** Usually **interpreted** (executed directly inside web browsers, though modern engines use Just-In-Time compilation).

Que. – 3

- **Start** → Oval (Start)
- **Step 1** → Rectangle [Open BookMyShow App]
- **Step 2** → Rectangle [Select Location / City]
- **Step 3** → Rectangle [Search and Select Movie]
- **Step 4** → Rectangle [Choose Date, Show Time, and Seats]
- **Step 5** → Rectangle [Proceed to Payment]
- **Decision** → Diamond < Is Payment Successful? >
- **Step 6** → Rectangle [Receive Booking Confirmation & Ticket]
- **End** → Oval (End)

Que. – 4

- Open the **Swiggy** app on your phone.
- Set or confirm your delivery address.
- Search for a restaurant or select a food item.
- Add the desired food items to your cart.
- Go to the cart and review your order.
- Click on **Proceed to Pay**.
- Select your preferred payment method (UPI, Card, Net Banking, or Cash on Delivery).
- Complete the payment transaction.
